Shalimar, FL, 32579

Summary

Results-driven full-stack developer with over 3 years of experience in designing, developing, and deploying applications for enterprise-level projects. Areas of expertise span various programming languages, development methodologies, and database management systems. Works great with problems and collaborations inside the team to deliver software solutions.

Relevant Skills

- React
- Typescript
- WordPress
- Shopify
- BigCommerce
- C#/.NET
- Blazor
- Entity Framework
- MVC
- Restful API
- UI/UX
- SCSS
- jQuery
- Tailwind CSS
- GraphQL
- Figma
- JUnit/XUnit
- Microsoft Azure
- AWS
- Git

Work Experience

Full Stack Engineer
QuickTie™
May 2023 - July 2024

- Participated in the entire software development life cycle, including design, development, testing, and deployment, ensuring high-quality deliverables.
- Developed and maintained an order management and customer management system utilizing React, Blazor, and ASP.NET, enhancing operational efficiency.
- Collaborated with the support team to troubleshoot client issues, achieving a 20% reduction in resolution time and improving client satisfaction.
- Proactively engaged in daily meetings, planning sessions, reviews, and bug fixing, contributing to effective team communication and project progress.
- Achieved a 95% score on Google PageSpeed Insights by optimizing website performance, improving customer experience and retention.
- Implemented and configured online payment gateways and AWS S3 for a robust cloud-based infrastructure, ensuring secure and efficient transactions.
- Managed version migrations, ensuring seamless transitions and minimal downtime.
- Implemented responsive web design principles, ensuring optimal viewing across various devices and platforms, resulting in a 35% increase in mobile traffic.
- Fixed bugs and maintained project documentation, ensuring a stable and well-documented codebase.

Environments: React, Typescript, ASP.NET, Blazor, Entity Framework, WordPress, JUnit, Meterial UI, DevExpress, SCSS, LINQ, Microsoft Azure, AWS S3, Redux, MongoDB, RESTful API, Visual Studio, Docker, CI/CD,

Front End Engineer
Badpixel
Feb 2021 - May 2023

- Developed B2B and B2C frontend applications with top-tier UI implementations using React, delivering intuitive and responsive user experiences.
- Collaborated with cross-functional teams to design and implement RESTful APIs for client-server applications, achieving a 30% reduction in response time.
- Designed and implemented user-friendly web applications, significantly enhancing user interaction and driving customer engagement.
- Integrated Google Maps API for location-based features, adding valuable functionality to web applications.
- Utilized the BigCommerce Admin Panel for efficient e-commerce management and customization.
- Refactored code to enhance overall performance, ensuring maintainability and scalability of applications.
- Leveraged SCSS and Bootstrap to create responsive and visually appealing designs, ensuring consistency across different devices and screen sizes.
- Implemented continuous integration and continuous deployment (CI/CD) pipelines, automating the development process and reducing time to market.

Environments: React, Redux, BigCommerce, OOP, SCSS, Bootstrap, Figma, jQuery, GraphQL, Google Maps, RESTful API, AWS, CI/CD

Educational History

Completed 4 years towards B.S. in Computer Science
Florida Gulf Coast University
2016 - 2020
